GLOW-IN-THE-DARK BOUNCY EGGS

Can you give your eggs a glow-up? Collect these ingredients and follow the instructions below for out of this world glow-in-the-dark bouncy eggs:

INGREDIENTS:

1 egg (or as many as you choose to make)
Clear glass
Vinegar
Highlighters
Black light

INSTRUCTIONS:

- 1** Carve out the highlighter from its plastic casing to extract as much ink as possible (don't be afraid to get messy!) into a glass jar
- 2** Carefully drop your uncooked egg, shell on, into the jar and pour the vinegar over it until it's completely covered
- 3** TIME TO WAIT! Patience is key--for ultimate results hang tight for two days until you see the eggshell disintegrate
- 4** Once ready, brush off the excess shell and shine your blacklight over for an ultra glowy reveal

THINGS TO KEEP IN MIND:

- Some highlighter colors will glow more than others
- Bouncing your eggs super hard could break them, so be careful!
- Test your scientific skills and learn about the anatomy of an egg while having fun!
