DIY GALAXY SLIME

Nothing beats our Crew Goo, but we thought we'd give you the next best thing with a super fun recipe for DIY Galaxy Slime! Follow the instructions below for super fun slime:

INGREDIENTS:

5 oz bottle of Elmer's Clear Glue

Food coloring (of choice)

Superfine glitter (colors of choice)

Liquid laundry starch (we recommend Purex Sta-flo liquid starch)

INSTRUCTIONS:

- 1** Mix your glue and slowly add 1/4 - 1/2 cup of liquid starch into a mixing bowl and be sure to stir well!
- 2** Squeeze a few drops of food coloring of your choice (or get really creative and test out different color combos!) and mix mix mix! If the color comes out saturated, don't worry! The colors will lighten as you often as you use the slime.
- 3** Time for glitter! Be sure to use less than a teaspoon of glitter, so it spreads evenly and doesn't form clumps
- 4** OPTIONAL: Add some space-themed sparkles or anything to help step up that galaxy theme!
- 5** Knead away! Keep kneading the slime until it's at the state that you like.

THINGS TO KEEP IN MIND:

- Store the slime in an airtight container to keep fresh
- If the results come out too sticky or too soggy, you can always add more glue or more starch
- Elasticity may fade over time, so continue to knead and stretch the slime to keep it super gooey!
